SATURDAY, NOVEMBER 20, 1875.

The Petoskey Democrat Again Mistaken. The editor of the Petoskey Domocrat to say the least, seems to have an utter lack of comprehension regarding the inland navigation matter, and displays an ignorance concerning the survey, that for a man in his position is totally inexcusable, considering the means he has of informing himself. In the Democrat of last week occurs the following regard-

ing the survey :
"Mr. John Keep, surveyor of this place, is out making a survey of the chain of inland lakes between this point and Cheboygan. This is something of vital importance to the prosperity of this country, and the railroad Co. are realizing the importance of the undertaking. and are doing all in their power to further the matter. We understand that Mr. Keep is employed by the Co. to make some time to make as thorough investithis survey, and he expects it will take gation as they require."

Now this item is correct with the exception of the fact that Mr. Keep is not making the survey, and is not in the em-TRIBUNE of three weeks ago, stated that not really available for other work. ploy of the railroad company. The LARMING LANDS AND TOWN LOTS for the survey had been ordered by the missioner had been appointed to have charge of the work in the interests of the state.
